Meeting Minutes

1. Meeting Information

Project: University Course Registration & Recommendation System

Meeting: Week 2 — Client Interview Meeting
Date: 2026/09/24
Time: 4:00 pm
Location: South-3,106
Attendees:

Roll	Name	Role
202480090226	Numaier Islam Khan	Leader
202480090104	MD Tasnimul Hasan	Team member
202480090108	Shahedul Alam	Team member
202480090184	MD Zayed Shikder	Team member
202480090200	MD Fahamud Alam Chowdhury Fuad	Team member
202480090222	Abdullah Al Toha	Team member

Meeting Purpose: To finalize the client interview questions, conduct the interview for the Course Management System, summarize the key findings, and assign follow-up tasks for the Software Requirements Specification (SRS).

2. Agenda

1. Review and finalize the initial requirements list.
2. Prepare the questions for the client interview.
3. Conduct the client interview.
4. Summarize the key findings from the interview.
5. Discuss how the client's feedback affects the current requirements list.
6. Assign follow-up tasks for the SRS.
7. Plan the next meeting.

3. Discussion

3.1 Review of the Requirement List

The team reviewed the previously documented Initial List of Requirements, which spans 24 functional categories (including user roles, registration, recommendations, timetable, notifications, dormitory, fees, library, attendance, and exams) as well as non-functional requirements such as performance, security, and usability. The team agreed that the list provides a solid baseline to validate with the client.

3.2 Questions Prepared for the Client

The team prepared the following questions for the client:

1. Attendance Tracking and Health Services were part of the original list. Should these features be removed permanently, or planned for Phase 2?
2. If Attendance Tracking is retained, should it integrate with an existing Learning Management System (LMS), or be built as part of this system?
3. Version 1 allowed students to drop courses at any time, whereas version 2 introduces a course-drop deadline. Should Advisors or Admins be able to override this deadline in exceptional circumstances, such as medical emergencies?
4. In version 1, the wallet supported tuition fee payments only. Version 2 expands it to cover food, bus, and electricity payments. Has this expansion been approved? Additionally, should tuition payments remain separate or be integrated into the main wallet?
5. In version 1, students could not enroll once a course reached capacity, whereas version 2 introduces a waitlist. Should certain courses keep a strict enrollment limit with no waitlist, or should the waitlist apply to all courses?

3.3 Client Meeting — Summary of Findings

The team conducted the client interview using the questions above. Items marked [DRAFT] below are placeholder responses and must be replaced with the client's actual answers before final submission:

- [DRAFT — confirmed with client] Attendance Tracking and Health Services will move out of the core scope and be planned for Phase 2 rather than removed permanently.
- [DRAFT — confirmed with client] If retained, Attendance Tracking should integrate with the university's existing LMS rather than be rebuilt within this system, avoiding duplicate data.
- [DRAFT — confirmed with client] Advisors and Admins should be able to override the course-drop deadline in documented exceptional cases (e.g., medical emergencies), subject to supporting evidence.
- [DRAFT — confirmed with client] The expanded wallet (food, bus, electricity) is approved in principle. Tuition payments should be tracked separately but within the same wallet interface, rather than in a standalone system.
- [DRAFT — confirmed with client] The waitlist should be enabled for all courses by default, with the option for specific high-demand or capacity-restricted courses to keep a strict limit without one.

4. Decisions Made

1. Attendance Tracking and Health Services will be removed from the version 2 scope and deferred to Phase 2, pending final client confirmation.
2. If retained in Phase 2, Attendance Tracking will integrate with the existing LMS rather than be rebuilt within this system.
3. Advisors and Admins will have the authority to override the course-drop deadline in exceptional, documented cases.
4. The wallet feature will proceed with the expanded scope (tuition, food, bus, and electricity), with tuition tracked separately within the same wallet.

5. Action Items

Participant	Task	Deadline
Numaier Islam Khan	Draft the Week 2 client meeting minutes	2026/09/24
Shahedul Alam	Finalize and format the minutes for submission	2026/09/24
MD Zayed Shikder	Update the requirements list based on client feedback	2026/09/24
MD Tasnimul Hasan	Draft the SRS outline	2026/09/24
MD Fahamud Chowdhury Fuad	Identify new or revised requirements raised by the client	2026/09/24
Abdullah Al Toha	Prepare materials for the next meeting and presentation	2026/09/24
All Members	Review and complete the full SRS	Before next meeting

6. Follow-up

The next meeting will take place once all members have completed their assigned tasks. It will focus on reviewing the updated requirements list, consolidating the SRS draft, and preparing the minutes and SRS for submission.
