# Meeting Minutes

## 1. Meeting Information

**Project:** University Course Registration & Recommendation System

**Meeting**: Requirement Elicitation and SRS Update for the Course Management System (Version 3)

**Date:** 2026/10/08

**Time:** 4:00 pm
**Location:** South-3,106
**Attendees:**

| Roll | Name | Role |
|---|---|---|
| 202480090226 | Numaier Islam Khan | Leader |
| 202480090104 | MD Tasnimul Hasan | Team member |
| 202480090108 | Shahedul Alam | Team member |
| 202480090184 | MD Zayed Shikder | Team member |
| 202480090200 | MD Fahamud Alam Chowdhury Fuad | Team member |
| 202480090222 | Abdullah Al Toha | Team member |

**Meeting Purpose:**

To plan the requirement elicitation process, prepare and conduct the client interview, identify and clarify the client's requirements, and update the SRS Version 3 based on the interview findings.

## 2. Agenda

1. Plan the requirement elicitation stage for the Course Management System.
2. Review the existing requirements and identify areas that need clarification.
3. Prepare and finalize questions for the client interview.
4. Conduct the client interview and record the client's responses.
5. Ask follow-up questions based on the client's answers.
6. Summarize the key findings and decisions from the interview.
7. Discuss the impact of the client's feedback on the current requirements.
8. Update the Software Requirements Specification (SRS) to Version 3.
9. Assign follow-up tasks and plan the next steps.

# 3. Discussion

## 3.1 Planning the Requirement Elicitation Stage

The team discussed the plan for the requirement elicitation stage of the Course Management System. Different elicitation techniques, including client interviews, questionnaires, observation, document analysis, and focus groups, were considered to collect and validate requirements.

## 3.2 Review of Existing Requirements

The team reviewed the existing requirements list and identified several areas that required further clarification from the client. These included Attendance Tracking and Health Services, LMS integration, course-drop deadlines, wallet payment expansion, and the course waitlist.

## 3.3 Preparation of Client Interview Questions

**1. Analytics & Dashboard**
Would you like the dashboard to show real-time information, or would daily or weekly reports be enough? Should only Admins have access to the dashboard, or should Faculty members also be able to see information about their own courses?

**2. Payment Integration**
Should the campus wallet be connected to external payment services such as local banks, Stripe, or PayPal, or should it be used only within the campus system? For electricity payments, should the system connect to electricity meters, or should Admins update the amount manually?

**3. Prerequisite Checking**
Should the system stop students from registering for a course if they have not completed the required prerequisites? Or should students be allowed to register with Advisor approval? Also, how would you like transfer credits to be checked?

**4. CGPA & Grade Appeals**
How should repeated courses or grade replacements be handled when calculating a student's CGPA? For grade appeals, would you prefer a complete approval process involving the Faculty, Department Head, and Dean, or would a simple submission form be enough?

**5. SSO & User Roles**
Would you like students and staff to log in using the university's existing accounts, such as Google Workspace or Azure AD? Also, should Admins be able to give someone a temporary role when needed?

**6. Messaging & Campus Events**
How would you like students to receive important messages—through email, SMS, or app notifications? Should students be allowed to create campus events themselves, or should only Admins and Faculty members be able to create them?

**7. Advisor Oversight**
Would it be useful for Advisors to have a dashboard where they can see a student's overall academic progress, such as CGPA and failed courses? Should students be able to update their own personal information, or should Admin approval be required?

**8. Waitlist**
When a seat becomes available, should the system automatically give it to the first student on the waitlist? Or should the student be notified first and asked to confirm their enrollment?

**9. Mobile Application**
Would you prefer a dedicated mobile app for Android and iOS, or would a web-based mobile solution be enough? Should students be able to choose which notifications they want to receive?

**10. Scalability & Data**
Since the system may need to support more than 50,000 students, do you expect it to be hosted on a cloud platform such as AWS or Azure? For important information, do you need updates to appear immediately, or would a small delay be acceptable?

## 4.Discussion Summary

The team discussed several important requirements with the client to clarify the system's expected features and future needs. The discussion covered analytics and dashboards, payment integration, prerequisite checking, CGPA and grade appeals, user roles and SSO, messaging and campus events, advisor access, waitlist automation, mobile application strategy, and system scalability. The client's feedback will be used to clarify the requirements, resolve open issues, and update the SRS Version 3 accordingly.

## 5. Action Items

| Participant | Task | Deadline |
|---|---|---|
| Numaier Islam Khan | Draft the Week -5 client meeting minutes | 2026/10/08 |
| Shahedul Alam | Finalize and format the minutes for submission | 2026/10/08 |
| MD Zayed Shikder | Update the requirements list based on client feedback | 2026/10/08 |
| MD Tasnimul Hasan | Draft the SRS outline | 2026/10/08 |
| MD Fahamud Chowdhury Fuad | Identify new or revised requirements raised by the client | 2026/10/08 |
| Abdullah Al Toha | Prepare materials for the next meeting and presentation | 2026/10/08 |
| All Members | Review and complete the full SRS | Before next meeting |

## 6. Follow-up

The team will review the client's feedback and update the requirements list accordingly. The updated requirements will then be incorporated into SRS Version 3. The next meeting will focus on reviewing the revised requirements, finalizing the SRS, and preparing the meeting minutes for submission.
